An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lindsay S. Adams on 4/19/07.

The application has been amended as follows:

In claim 1 line 6 "with structural additives to" has been changed to – in a pug mill with structural building material additives comprising cement and fly ash, to form a structural article and -.

Claim 8 has been canceled.

The following is an examiner's statement of reasons for allowance: The primary reason for allowance of the claims is recitation of the method steps comprising adding liquid to the dredge material thereby forming a slurry, wherein contaminants are removed by admixing at least one oxidizing agent with the slurry, and directly mixing the solid portion in a pug mill with structural building material additives comprising cement and fly ash to form a structural article, and provide a beneficial use product, in combination with the removing and separating steps.

This combination of steps is not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
